June 2, 2016

Dear Parent/Guardian,

As summer approaches, many of you are making arrangements for your children's summer physicals and immunizations.

Please note the very important following information **regarding recent changes to NY State mandated immunizations:**

All students are required to have two Varicella (Chicken Pox) vaccines, before entering 6th grade, as well as one Tdap (Tetanus Diphtheria and Pertussis) vaccine when they turn 11 years of age.

All students are required to have one Meningococcal (Meningitis) vaccine before entering 7th grade.

Further information regarding immunization requirements can be found on the Commack Website. Any questions regarding your child's specific immunizations and/or related health concerns should be directed to your primary health care provider.

Sincerely,

Amy J. Ryan

Amy J. Ryan

Assistant Superintendent for PPS
