Dear Parents,

As teachers of the 11th grade Science Research course, we would like to take this opportunity to welcome you and your child to this program. Our program will provide students with opportunities to further develop their independent science research skills. We will help students develop these skills through a year-long research project in science, math, or technology.

The research class meets for one period every other day for a full year. The progress of each student will be evaluated by successful completion of the course requirements which include the completion of a major science project. The progress of each student will be evaluated by successful completion of the course requirements with an emphasis on research design, writing and presentation skills. Participants in the course are encouraged to continue in the research program throughout their high school career.

For you and your child's benefit we have created a comprehensive science research website containing program information, due dates, useful research tools and pertinent Internet links. As always, if you have any questions or require further clarification about the research program, please do not hesitate to contact us. We look forward to working together with you and your child to ensure a successful learning experience.

Sincerely,

The Research Teachers
