

Movement In The Arts

Grades K-5

Chalk Design

Equipment needed: Tape and Chalk

Rules: For this fun activity, you will need some painter's tape and some chalk. Create a design with tape outside on a surface that you can draw with chalk. After the design is created, any cement or blacktop in between the lines is "lava". Try to color in all of the open spaces without touching the surface with your hand. (You can touch the tape). After the open spaces are colored in, peel up the tape to see your finished product! Send us picture!

Mine are attached.

Grades K-2 : Try to spell your name with the tape or get creative and make your own design!

Grades 3-5: Try to make a house or get creative and make your own design!

There are many benefits to an activity like this. Enjoy and have fun!!!
