

We Care About Our Earth at Indian Hollow

Dear Families,

Once again we will be collecting plastic bottles to be recycled as a part of our Earth Day celebration. A collection bin will be located in the school's lobby. We are excited to announce that this year we will be using the proceeds from our recycling efforts to provide support to the World Wildlife Fund to help save the African Rhinos. Please send in **2 plastic bottles** to be placed in our recycling bin in the main lobby. By participating in our recycling efforts, our children learn that small actions can make a big impact! Thank you!

The Courtyard and Environment Committee

Adopt an African Rhino African rhinos are divided into two species—the black rhino and the white rhino—living in open savanna and threatened by the illegal trade of their horn. Southern white rhinos, once thought to be extinct, now thrive in protected sanctuaries and are classified as Near Threatened. But the Northern white rhino subspecies is believed to be extinct in the wild and only a few captive individuals remain in a sanctuary in Kenya. Black rhinos have doubled in number over the past two decades from their low point of 2,480 individuals, but total numbers are still a fraction of the estimated 100,000 that existed in the early part of the 20th century.
